*Where innovation meets excellence*

# WHAT MAKES A SUPPLIER TRULY EXCELLENT?

## QUALITY?

The capability to provide materials engineered and manufactured to the highest possible standards, ready for use.

## CONSISTENCY?

The ability to deliver this high quality time after time after time.

## EXPERIENCE?

The wherewithal to instinctively know how things are done and respond quickly.

## RELIABILITY?

The art of being someone you can confidently depend on to deliver precisely as promised.

## SERVICE?

The gift of going way beyond merely meeting your specifications.

## COMMUNICATION?

The knack of keeping you totally up to speed on progress.

## ALL OF THE ABOVE?

Absolutely – you should demand nothing less from your suppliers.

With that in mind, please allow us to introduce ourselves.

Kenro Metal Services, at your service.

## END-TO-END METAL SOLUTIONS SINCE 1979.

For 35 years, clients across the nation have placed their trust in Kenro to engineer, manufacture and fabricate outstanding metal solutions to meet precise business and whole-of-industry needs.

Based in Toowoomba, Queensland we specialise in steel, aluminium or stainless steel products from design through to assembly right through to onsite delivery, plus every process in between such as welding and fabrication, pressing and bending, coating and painting to name but a few.

Our vast experience working alongside some of Australia's leading companies in the Civil and Construction industries allows us to deliver exactly what you require – whether it's an industry-specific product or a fully customised manufacturing solution.

Kenro operate from a 3750m<sup>2</sup> manufacturing facility and with our state-of-the-art equipment, we have the flexibility and resources to meet any challenge. We are committed to World Class and Lean Manufacturing, and are constantly implementing Best Practices Programs.

### INNOVATION FROM START TO FINISH.

Kenro have built a formidable reputation as a leading Australian manufacturer and it's all based on excellence. Our meticulous standards are built into everything we do – from the most complex fabrications right down to the most intricate componentry. Near enough is never good enough.

We are uncompromising about accuracy, with rigorous quality control at every step of the process, not just at the finish. For example, we keep all tooling in first class condition, so there are no sharp edges. It's detail like that which help us complete the big picture.

Kenro operate a fully compliant ISO 9001-2008 Quality Management System. Furthermore we utilise a sophisticated Enterprise Resource Planning (ERP) system. Totally integrated, it manages and monitors every step of the process and will instill you with utmost confidence. Should you require further assurance and traceability, we can supply an ITP (Inspection Test Plan). This guarantees that all processes have been followed to the letter, even key Witness Points where required.

### KNOW PRECISELY HOW WORK IS PROGRESSING.

Kenro are keenly aware of the impact that delays have on your project. We know that if materials aren't there when you need them, it creates a flow-on effect that can have significant consequences down the line.

We are serious about communication from order confirmation right through to despatch and will keep you updated as to when your order should be expected. In the unlikely event of a delay, you will hear about it immediately.

Your products and components will be delivered in full on time because we have a vested interest in getting your job done; both our reputations are on the line. We want you to have such confidence in Kenro, dealing with us becomes second nature.

## EXACTLY WHAT YOU NEED. PRECISELY WHEN YOU NEED IT.

Kenro is dedicated to developing quality, top-level products for the Civil and Construction industry.

We supply everything from custom-fabricated solutions purpose-built to meet any application, to ready-made solutions such as stumps, stair stringers and security fencing systems. We are constantly growing our range of quality products to meet our customers' needs for any size, scale or specification in a host of infrastructure projects – roads, rail, bridges, power stations, port developments and more.

# COMPLETE TURNKEY SOLUTIONS.

All centred around convenience, flexibility and cost-effectiveness.

- Design and engineering.
- Manufacturing and fabrication: from complex frames and structures to bulk metal components.
- Protective coatings: galvanizing, zinc plating, powder coating, and painting, etc.
- Fitting and assembly: to suit your precise requirements
- Packaging solutions: special consideration given to size, weight, quantity, weather, distance and handling capabilities.
- Transport and delivery: onsite, on time, on budget.

Sale Yard Gates, Muchae WA

Pit Covers, Collumboola Substation, QLD

Steel Gantry, Building Site, Brisbane QLD

EVERY ANGLE COVERED  
ON EVERY JOB,  
EVERY TIME.

# READY FOR ANY CHALLENGE

## FULL RANGE OF EXPERT SERVICES.

Comprehensive metal manufacturing, fabrication, welding and coating services including:

- Fabrication and Welding (to certified standards)
- Pressing and stamping
- Cropping and punching
- Drilling and tapping
- Linishing & rumbling
- Bending and folding
- Profile cutting
- Laser cutting
- Machining
- Guillotining
- Sawing
- Protective coating
- Fitting and Assembly
- Packaging

## INNOVATIVE PRODUCTS FOR THE CIVIL & CONSTRUCTION INDUSTRY

- Proven products based on real industry insights
- Can be custom-fabricated to your company's specific needs
- Extensively tested for optimum performance

Anti-throw Screen mesh, Gateway Bridge, Brisbane QLD

# OUR EXACTING STANDARDS.

- Built for you, built for your industry
- Every solution driven by your business needs
- Innovative industry-specific products inspired by 35 years' experience and insight.
- Everything customized specifically for your business.

## EQUIPPED FOR NEARLY ANYTHING

- First-rate, high-capacity facilities, resources, skills and track record to deliver on any project – big, bulk, complex, intricate, small or straightforward – and in short timeframes.
- Any production run, range of materials, bulk quantities, one-off or high volume.
- Highly skilled team consisting of engineers and qualified people in a range of trades.

## LOCAL INSIGHT, WORLD-CLASS QUALITY

- Vast local experience and innate industry understanding (regionally and nationally).
- On-shore, in-house manufacture, storage facilities: shorter lead-times, tailored solutions, close working relationships, tighter control
- Local industry participation.
- Exceptional quality, safety and environmental standards: ISO 9001, AS4801, ISO14001
- Global outlook, constantly evolving, thirst for innovation.

## MORE FOR YOU

- Added value at every step, through direct experience and expertise.
- Proactively help you to enhance products, processes, operations and infrastructure.
- Outstanding service with steadfast precision and efficiency that brings real confidence.
- Our innovation helps enhance your design, making it more manufacturing-friendly and cost-efficient.

# STRIVING FOR EXCELLENCE RIGHT ACROSS AUSTRALIA.

There is more to Kenro than great products, exceptional quality and first-class service.

Our handpicked team uses their experience to clarify specific requirements, anticipate potential problems and pinpoint ideal solutions. We pride ourselves on turning ideas into innovations and improvements to take your industry forward and put your business a step ahead.

With a full range of specializations and services, we are constantly striving to save you time and money through total efficiency, competitive pricing and products that pass the toughest test – the test of time.
