KENRO

ABOUT US

Kenro Metal Services is a family owned and operated Australian business, specialising in metal fabrication and welding. Founded in 1979 and headquartered in Toowoomba, Queensland, Kenro is well suited to servicing all areas of Australia.

With a firm commitment to World Class and Lean Manufacturing, Kenro is constantly training our staff in various trades, and constantly implements Best Practices Programs.

To this end, we have achieved Quality Assurance (QA) Certification to ISO 9001- 2008 standard.

Furthermore, thanks to our exclusive ***"Get It On Time"***, philosophy, when we say you will have your shipment delivered at a pre-arranged place at an agreed time, you can count on it!

QUALITY SOLUTION ON TIME!

Doing business with Kenro is simple;

1. Provide us with a drawing or sample of your component.

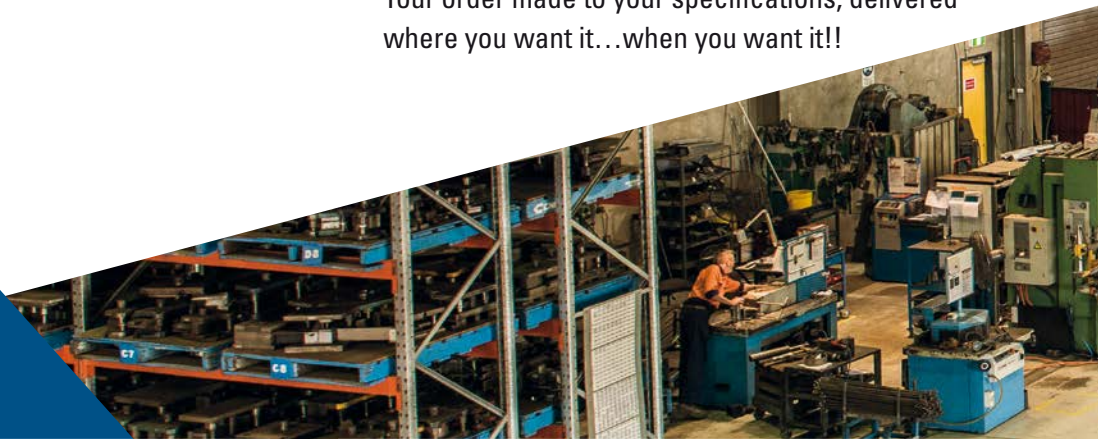

You will promptly receive a quotation with a fixed item cost.

2. Place your order with us.

We will discuss every aspect of your job requirements, including tolerances, coatings, assembly and packaging, in addition to negotiating an acceptable lead time.

3. We will deliver your order on time!

Your order made to your specifications, delivered where you want it...when you want it!!

CUTTING

Kenro is at the forefront of metal cutting in Australia, due to our unswerving attention to detail.

We have cutting machines for a wide range of different applications, including cropping, guillotining, sawing and laser cutting, so regardless of the type of metal you need cut, the profile section of the material or how you need it done you can count on Kenro for a quality result.

Working on the principle “the sharper the blade, the cleaner the cut”, we supply metal components of the highest quality, and safe to handle, without untidy or unnecessary burs.

- Flat Bar
- Round Bar
- Angles
- Square Billet
- Square or Radius-end cropping
- Mitre Cutting
- Sheet
- Plate
- Hollow Sections (RHS, SHS, CHS)
- Beams
- Channels
- ***You name it, we cut it!***

PUNCHING

Kenro are renowned for the quality and accuracy of our Metal Punching service.

With over 40 years' experience and a wide range of hydraulic and mechanical metal punching machines, dies and power presses, we are capable of punching up to 200 tonnes to any type of metal.

Our machines enable us to punch virtually any shape hole, from sizes as small as 3mm diameter up to 240mm diameter, through material thicknesses up to and including 25mm.

Kenro can also custom make tooling for producing components with special properties such as multiple holes and tube punching (through one or both walls).

- Round
- Square
- Slotted
- Rectangular
- Keyhole
- Any custom shape

PRESSING & STAMPING

Looking for metal pressing and metal stamping facilities? Our wide range of presses and in-house tool-making allows us to produce components exactly to your specifications, quickly and cost effectively.

Modern state-of-the-art C-Frame presses range up to 250 tonne which is sure to cover most if not all your stamping requirements. Precision material feeders and electronic safety guards enable your product to be made at optimum efficiency, without compromising on safety.

We'll even store and maintain your existing press-tooling for you. This gives you the peace of mind you need. You can depend on our qualified toolmakers too!

BENDING & FOLDING

Metal bending and folding calls for consistency and accuracy, and Kenro have the experience and skills to offer you the perfect solution. Our bending machinery and wide range of tooling produces clean, accurate bends efficiently and precisely every time!

- Flat Bar
- Angles
- Square Bar
- Round Bar
- Pipe
- RHS
- Sheet
- Plate

DEBURRING

Being a certified Quality Management company, Kenro place a great deal of importance on deburring. Not only to improve the appearance of the component but also for safety, we recommend that before any product leaves our facility, sharp edges and dags are removed. This is certainly recommended prior to applying protective coatings. All metal products are not the same – our deburring makes the difference!

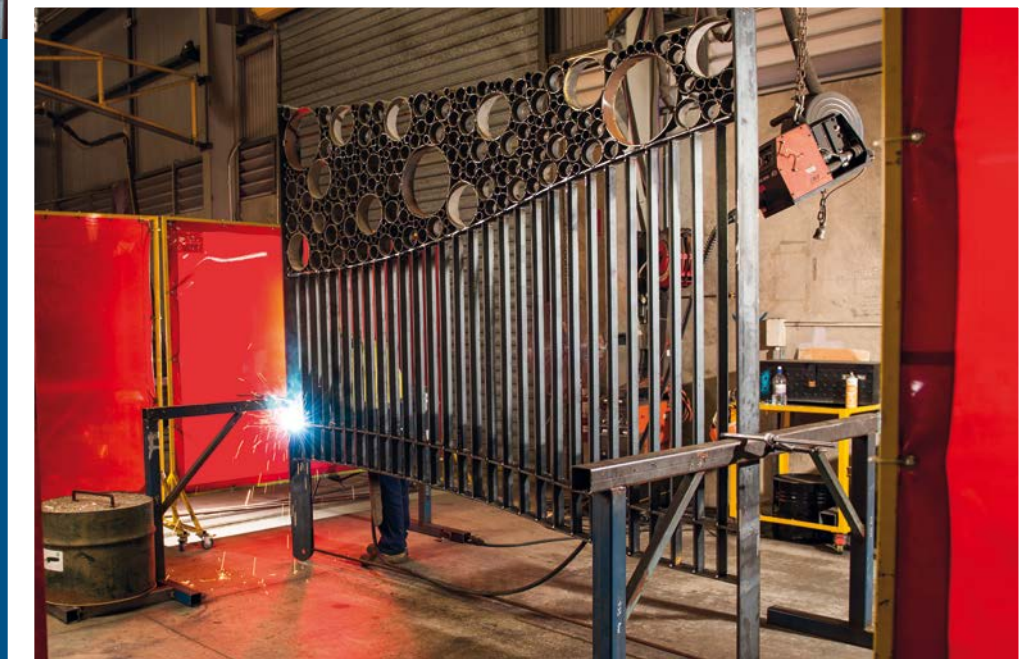

- Linishing
- Rumbling
- Vibrating
- Grinding
- Sanding
- Radius Tool
- Hand Tools

WELDING & FABRICATION

At Kenro, welding and fabrication is our speciality. Whether you require a large, complex fabrication, or 1000's of intricate welded assemblies, we can produce and supply steel fabrications precisely to your specifications regardless of your industry. Our skilled, qualified boiler-makers are fully committed to delivering you the quality you deserve.

- AS1554.1 SP qualified welders (weld testing available)
- MIG, TIG , Arc Welding
- Gouging and Plasma Cutting
- Hard Facing
- Jig Welding for repeatability
- Straight Line Welding

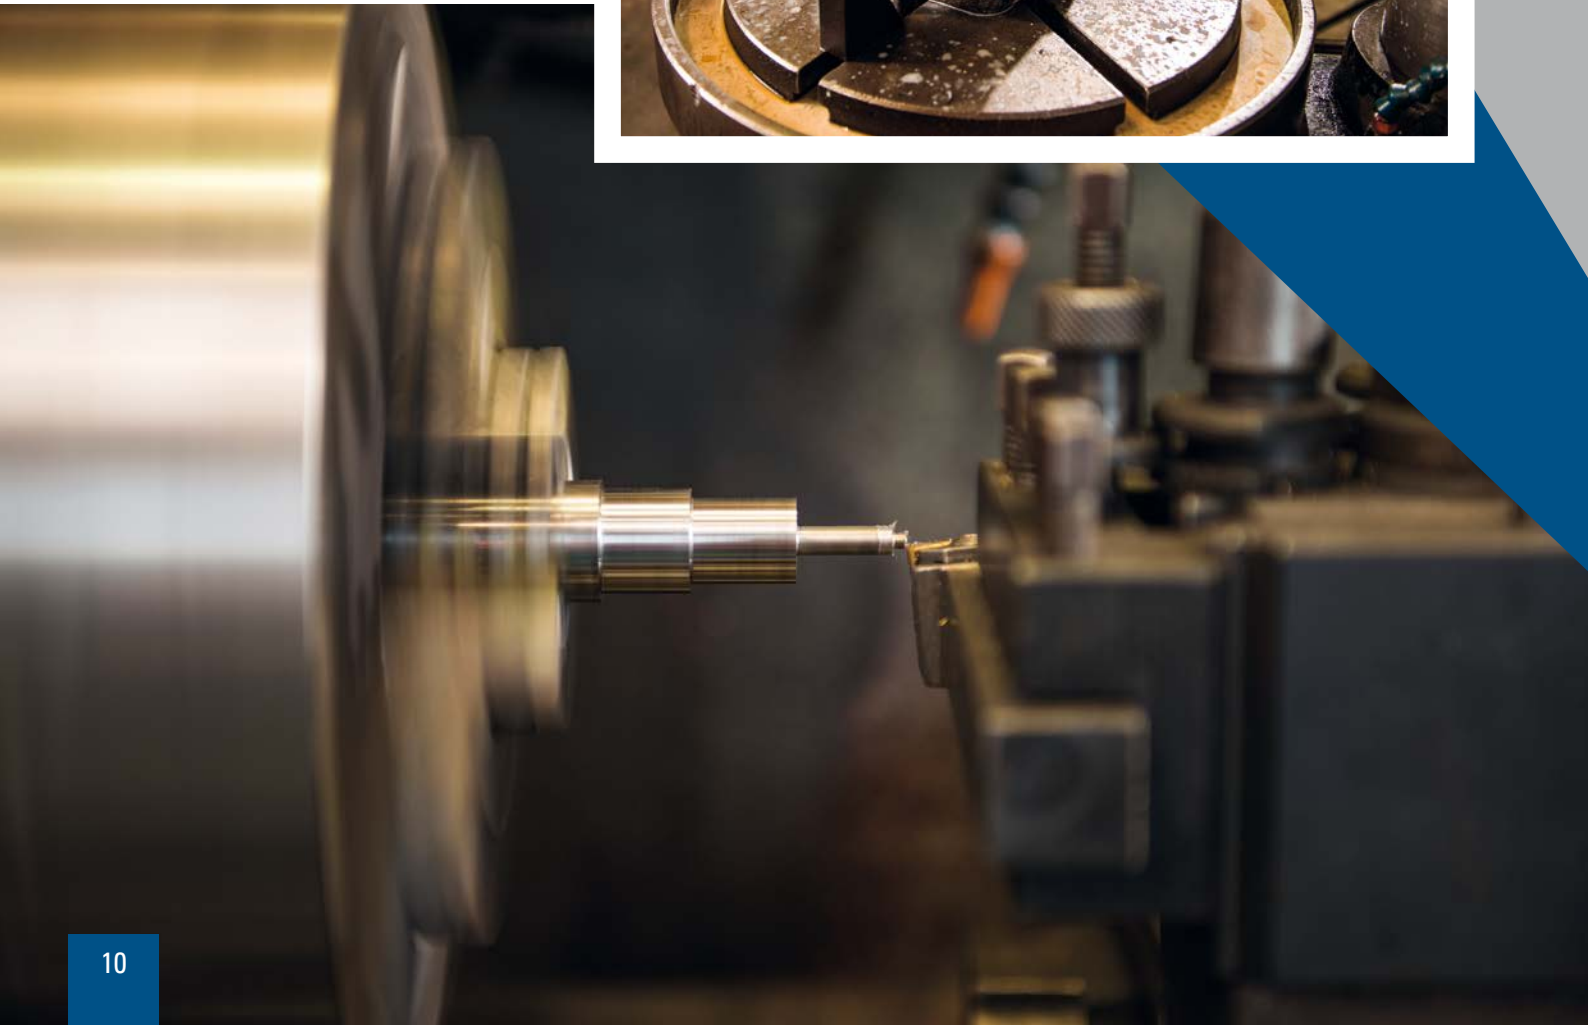

MACHINING

Kenro also offers quality repetition machining services. We specialise in precision workmanship.

State-of-the-art CNC technology brings you high quality, consistency and faster turnaround times. Utilising our own machine shop, and working closely with other workshops, Kenro offers you a one-stop solution to your machined component requirements.

- Turning
- Multi-axis Machining
- Thread Tapping
- Thread Rolling

PROTECTIVE COATINGS

Metal finishing is paramount at Kenro. With access to some of the largest coating facilities in Australia, we're confident we can manage your project – regardless of size. We can provide certification on coatings, ensuring your absolute peace of mind. We will arrange quality protective coatings to your specifications; whether it be Galvanising, Zinc Plating, Powder coating or Painting.

- Protect against Corrosion
- Reduce the cost of clean up
- Improve the longevity of your product
- Premium quality and finish
- Tough coatings
- Improve product life
- Range of colour available

ASSEMBLY

Kenro will fit and assemble your metal parts to your precise requirements, whether you require bolts or rivets to be inserted or multi-component assemblies, we'll do it all for you! We can incorporate parts from other sources, including free-issue components and you can be sure that everything will be exactly as agreed.

PACKAGING

Attention to detail is essential at Kenro Metal Services. Not only does appropriate packaging protect the parts from damage in transit and inclement weather, but we consider it imperative to ensure that batches arrive in the correct batch quantities, at the right weight, on time! Accurate documentation is always crucial, so we clearly mark each and every package.

- Bags
- Boxes
- Cartons
- Drums
- Crates
- Stillages
- Purpose-built packaging

TRANSPORT

Kenro see transport as the finishing touch. We carefully consider the weight of our metal fabrications, as well as the distance they have to travel, and loading/ unloading facilities at both ends. We work with a variety of reliable transport companies to get the fastest shipping time so we can promise that you will... **Get It On Time.**

- Truck
- Rail
- Ship
- Air Freight
- Unless otherwise specified, Free Into Store (F.I.S)

TOOLMAKING

Paying careful attention to the finest detail of your product, Kenro can produce quality, accurate and functional components for manufacturing efficiency. There's no one better to design and make a tool than the people who actually use the tool themselves; Kenro offers you a complete in-house 'design and build' service. Our highly skilled toolmakers will work with you to meet your specifications, timeframes and budgets.
