

# Metal Mass Densities

Material Type	Mass (kg/m <sup>3</sup> )
Aluminium	2,710kg
Bisalloy	7,850kg
Brass	8,330kg
Lead	11,325kg
Mild Steel	7,850kg
Stainless Steel	8,100kg

*Indicative mass densities only. Mass densities shown in this selective list may vary, depending on material composition. Where calculations need to be precise, exact density factors should be obtained from manufacturers or other appropriate sources.*
